ABOUT

Enoch Chejieh is a software engineer with 2+ years of experience ranging from frontend to backend technologies.

Experience in Frontend developmentment (VueJs, NuxtJs, ReactJs, HTML, CSS, and SASS) with high consideration for web accessibility.

Experience in Blockchain development (Rust and Substrate) with high consideration for scalability and security.

He is passionate about open-source and also making the web more accessible to everyone, he enjoys writing articles, sharing his knowledge.

SKILLS

BABCOCK UNIVERSITY, Ilishan-Remo, Nigeria
Bachelor of Science - BS, Computer Science (Technology)
2017 - 2021

PROFESSIONAL SKILLS

- VueJs
- NuxtJs
- Rust
- Substrate
- Vuex
- Typescript
- ReactJs
- Redux
- Test Driven Development
- Smart Contract Development
- MongoDB

PROFESSIONAL EXPERIENCE

Blockchain: Substrate | November 2021 - present

Currently familiarising myself with Substrate by learning the architecture of substrate and how to build parachains with it. In the meantime, these are all that I have been able to do with the Substrate framework:

- Contributed to substrate's repo, mostly did code refactoring.

Software Engineer | Acumen Digital (Lagos, Nigeria) | October 2020 - present

- Implemented frontend-related tasks using VueJS and NuxtJs based on user requirements from the product team.
- Designed interactive UI mockups based on user requirements.
- Improved performance and accessibility of user websites.
- Responsible for quality assurance of finished websites including testing and debugging of code.
- Built user dashboards for data visualization and information management of user data.
- Built chat messaging SDK for VueJs web applications.
- Reduced chat SDK bundle size by 40% to be installed by Vue web applications.

Software Developer Intern | Kamusi Project International / USA | August 2018 - September 2018

- Implemented UI features using HTML, CSS, and Javascript for a web e-learning platform.
- Collaborated with a diverse team in redesigning the company website.
